Objects

Confidential

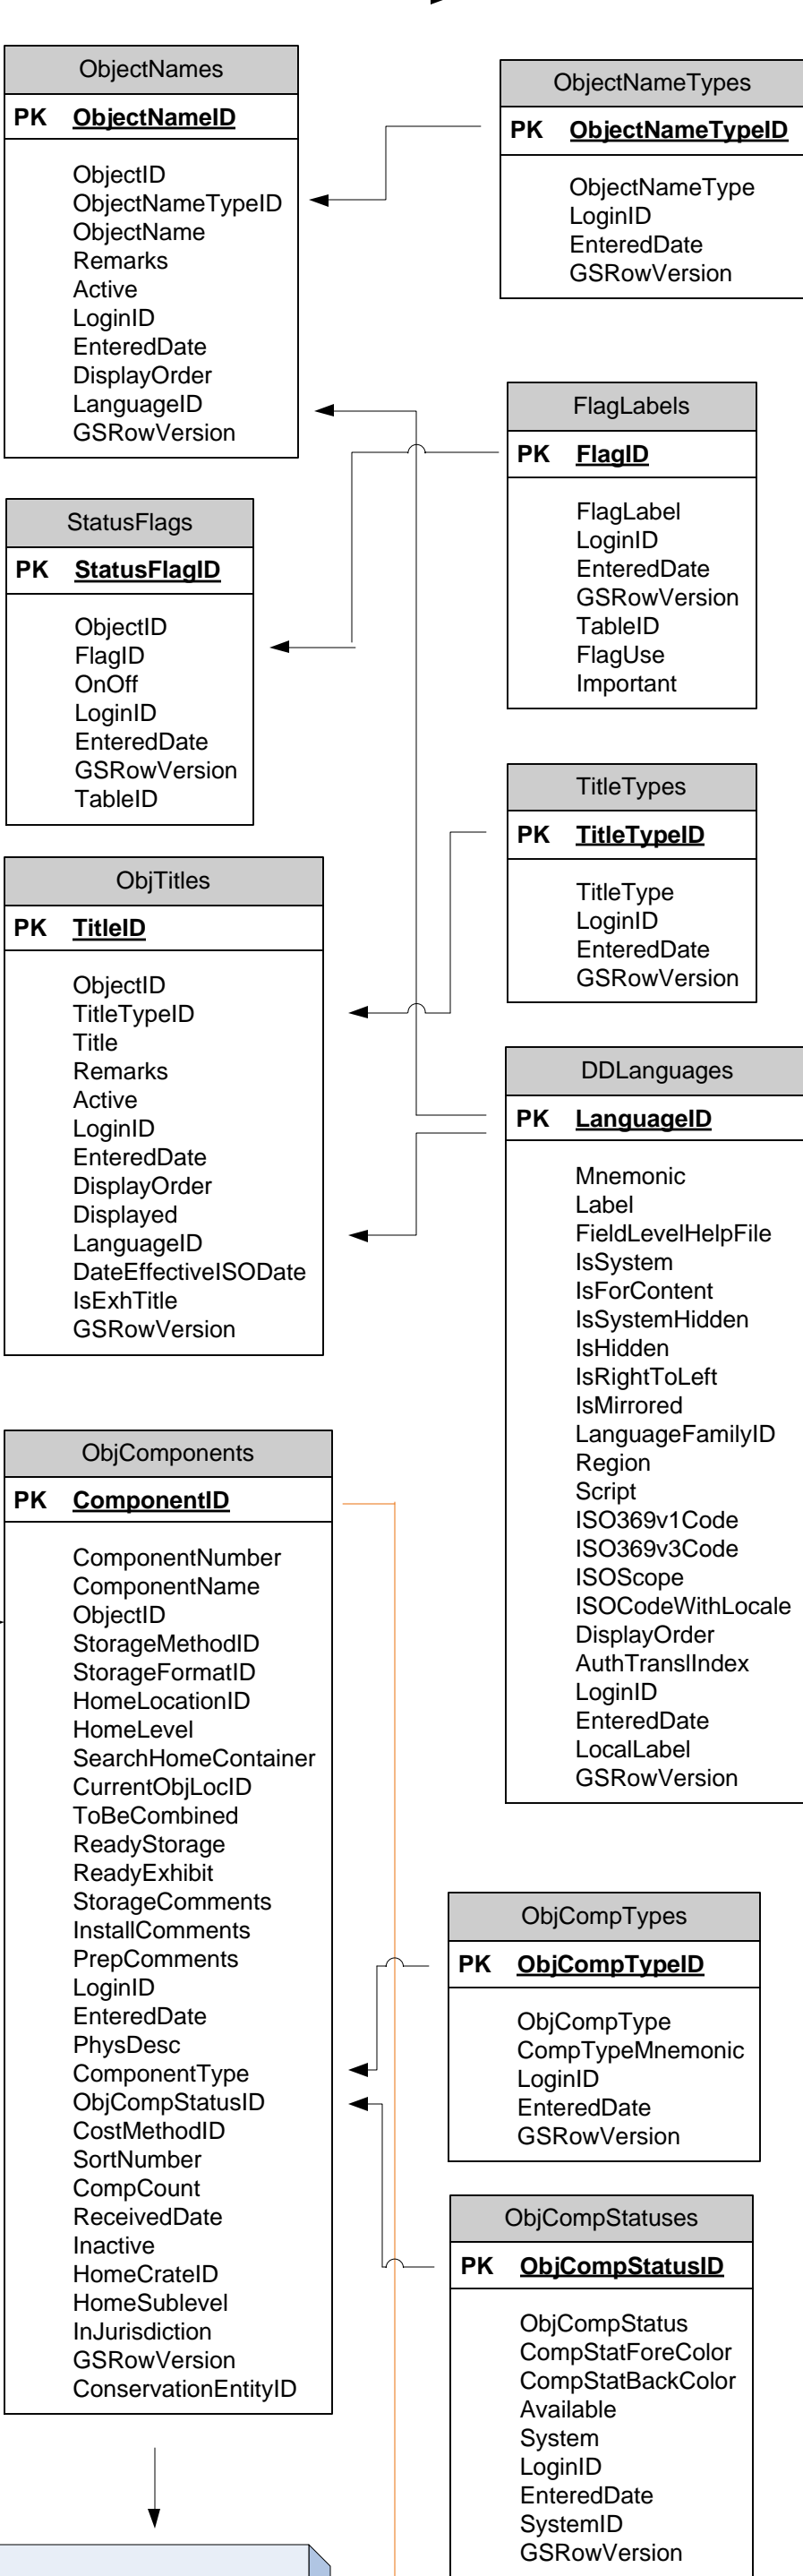

Main Table

Special link maintained by program, for primary classification. It is the classificationID stored as DisplayOrder 1 in ClassificationXRefs.

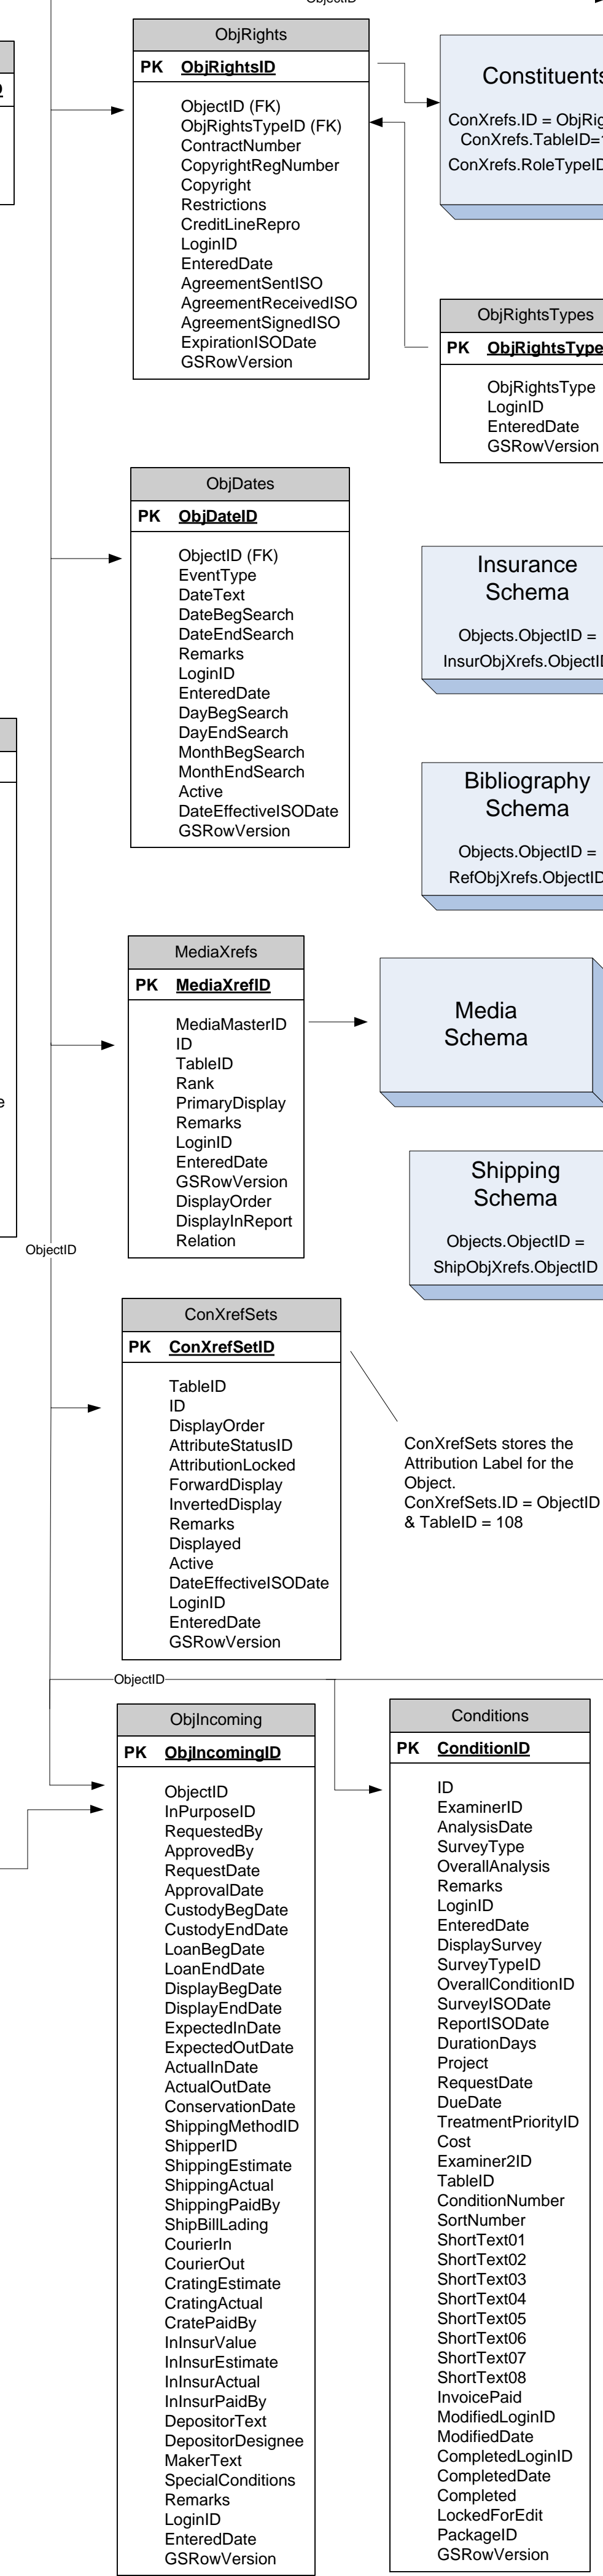

Tables which link to Objects with **TableID = 108** and **ID=ObjectID**
AltNums, Associations, AssocParents, ClassificationsXRefs, Conditions, ConXrefSets, DimItemElemXRefs, MediaXRefs, PackageList, Relationships, TextEntries, TextTypes, ThesXRefs, ThesXrefTypes

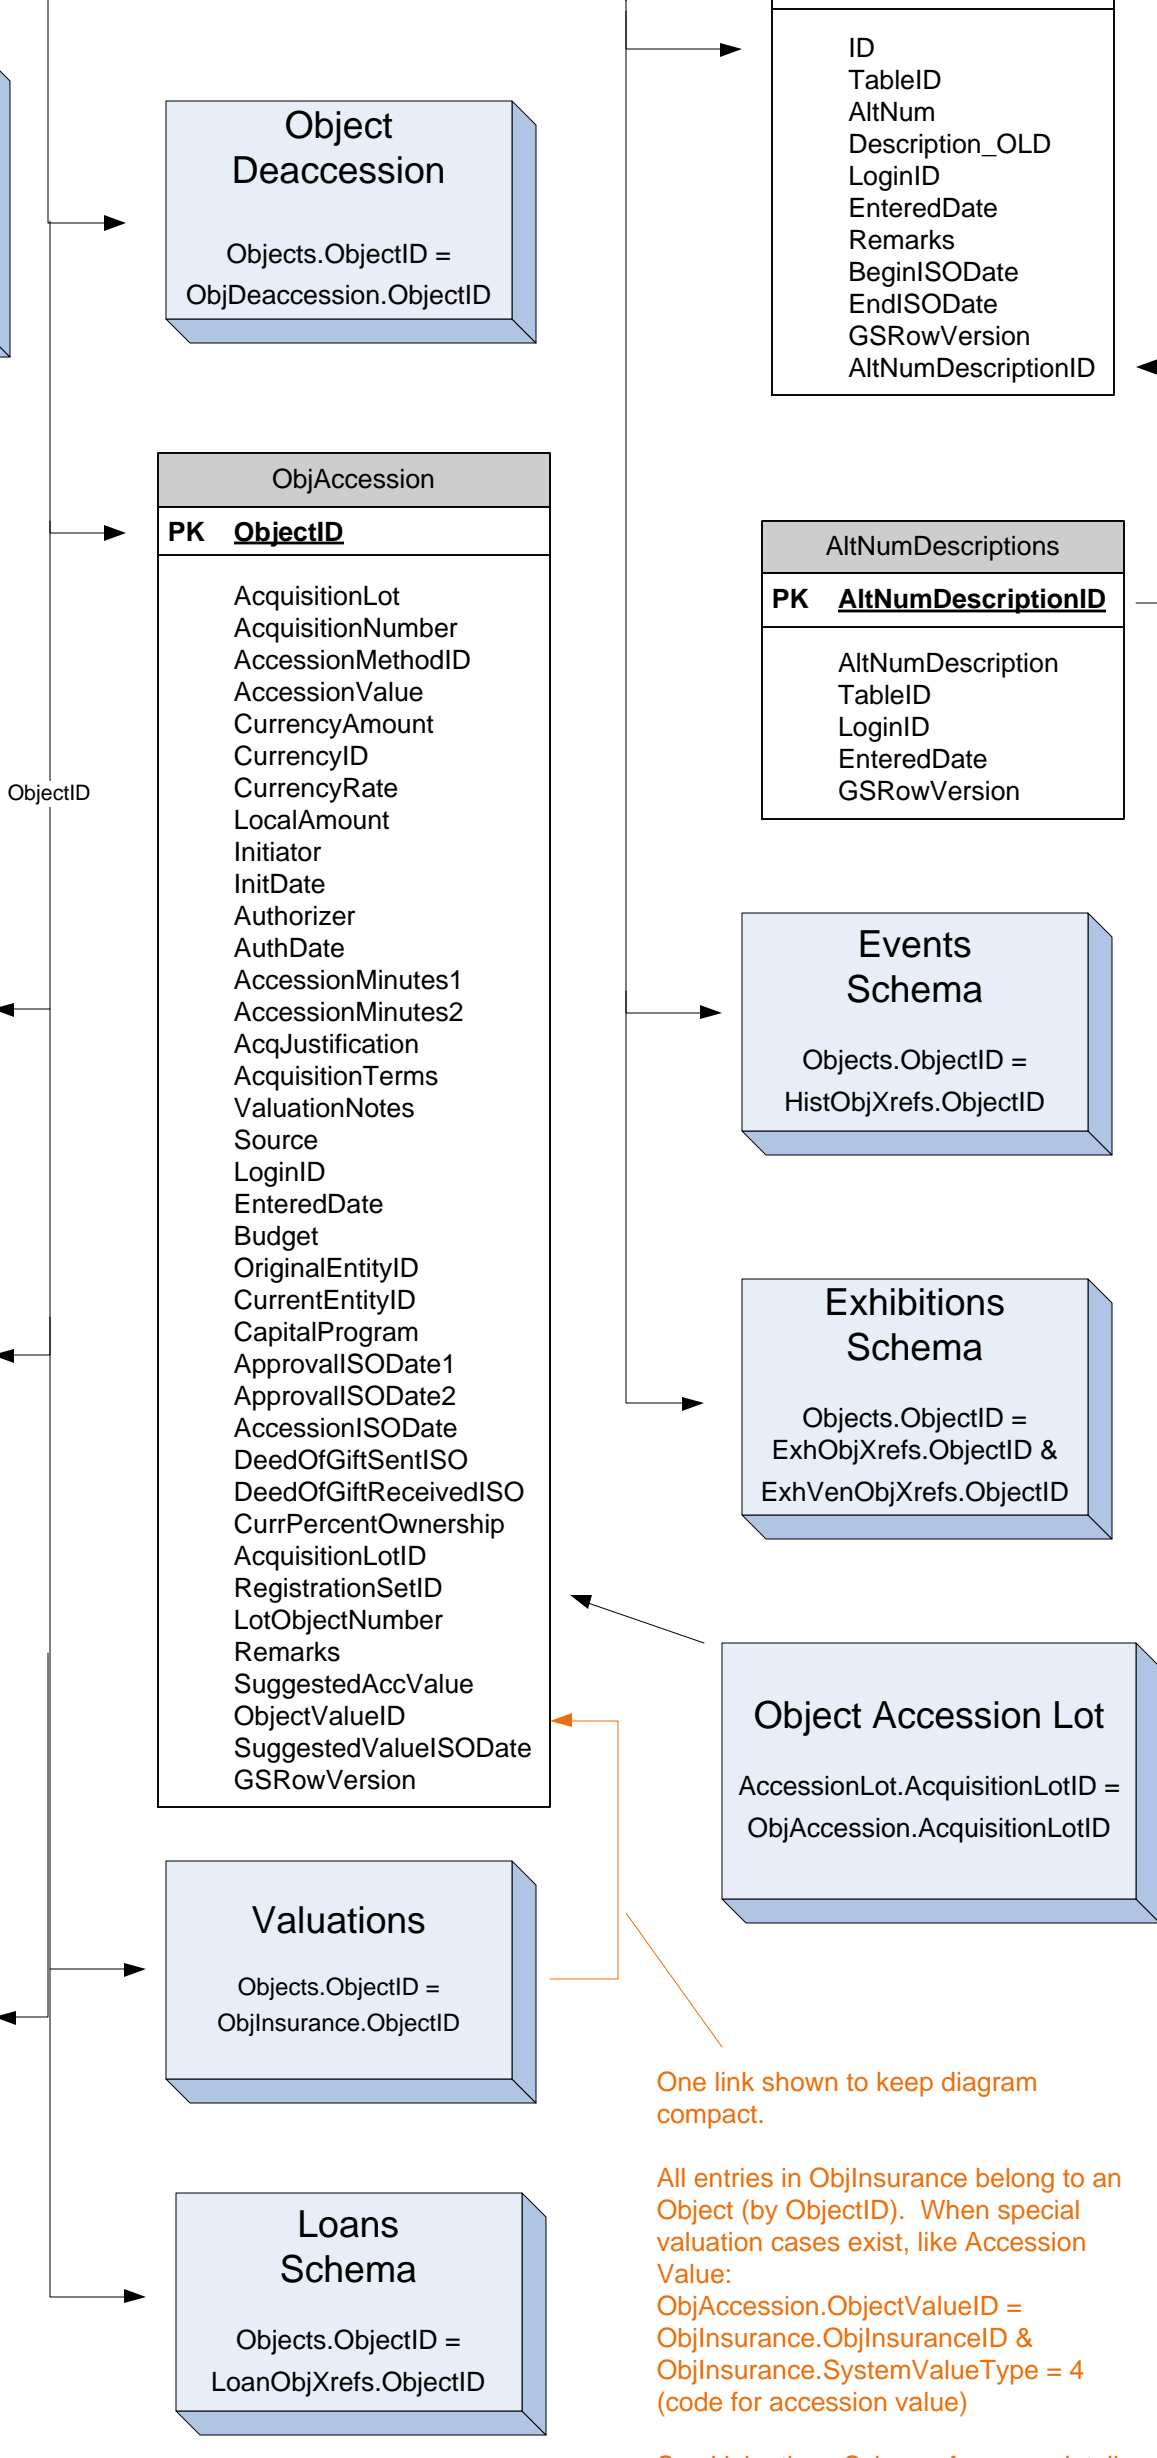

Dimensions exist at both the Object and Component level. You may need to connect DimItemElemXRefs multiple times (TableID 108,94)

Sub-Models and Tables which link to Objects through ObjectID
ExhObjXrefs, ExhVenObjXrefs, HistObjXrefs, InsurObjXrefs, LoanObjXrefs, ObjAccession, ObjContext, ObjComponents, ObjDates, ObjDeaccession, ObjGeography, ObjIncoming, ObjInsurance, ObjTitles, RefObjXrefs, ShipObjXrefs

ConXrefSets stores the Attribution Label for the Object. ConXrefSets.ID = ObjectID & TableID = 108

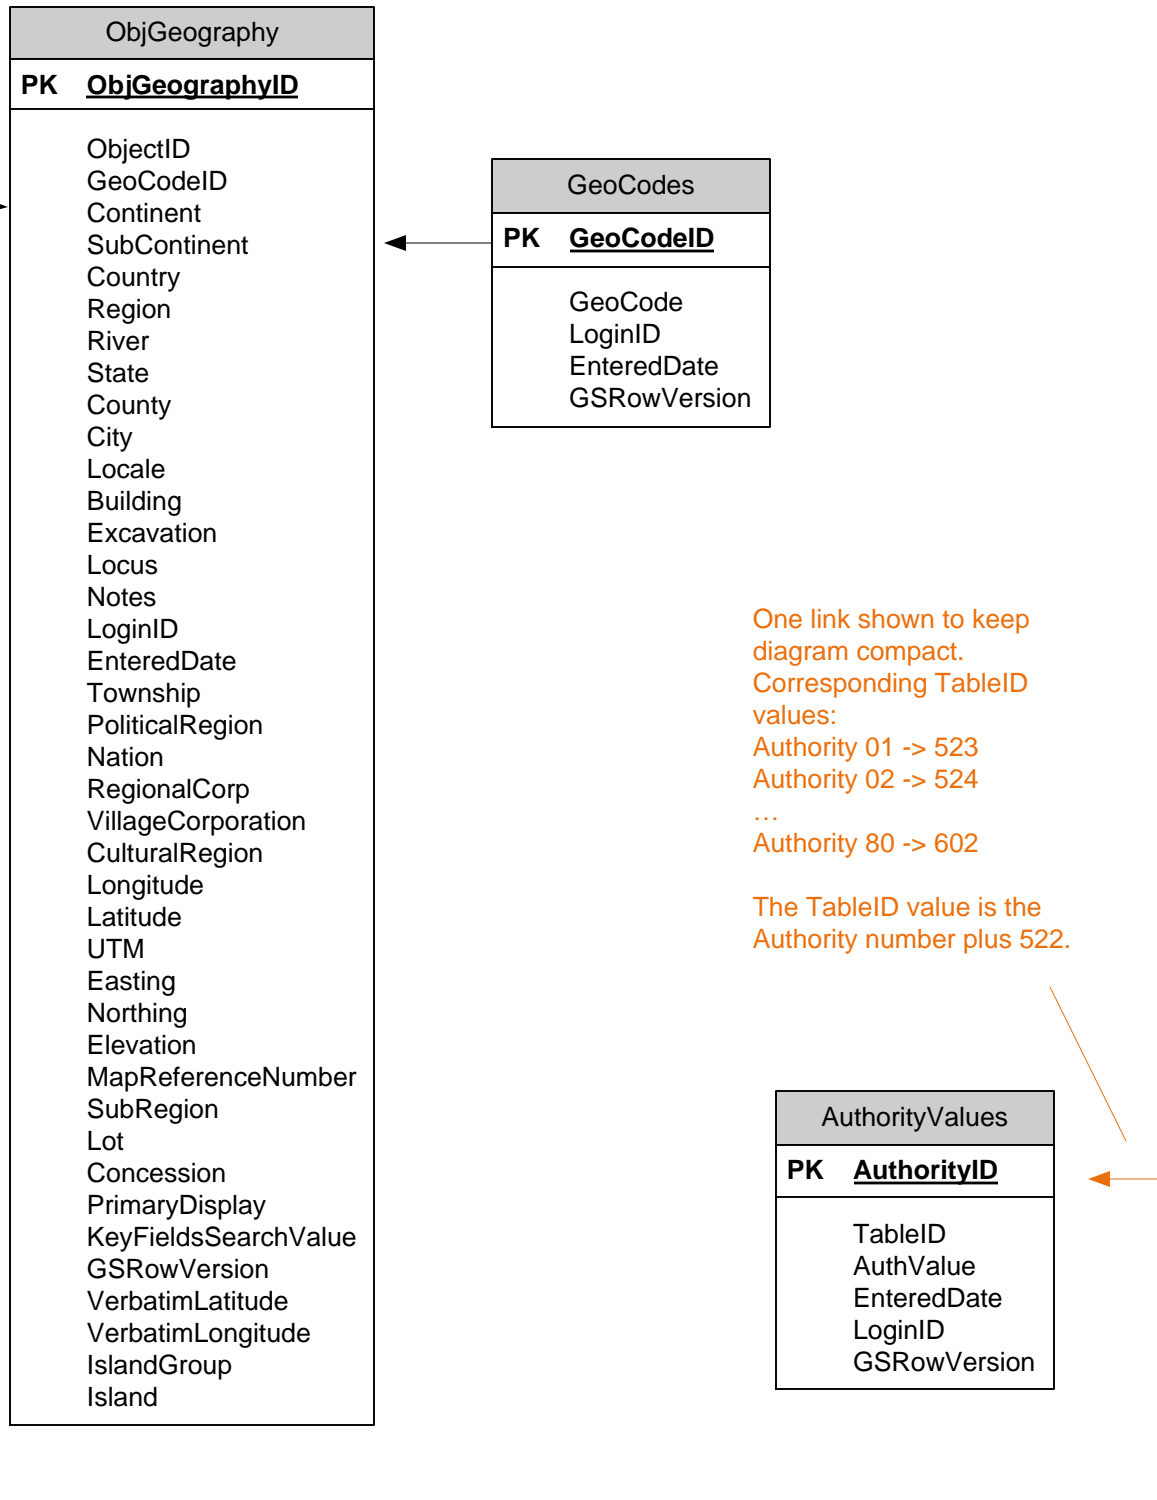

Sub-Models and Tables which link to Objects in non-conventional ways:
AuditTrail
ConXrefs
StatusFlags

One link shown to keep diagram compact.

All entries in ObjInsurance belong to an Object (by ObjectID). When special valuation cases exist, like Accession Value: **ObjAccession.ObjectValueID** = **ObjInsurance.ObjInsuranceID** & **ObjInsurance.SystemValueType** = 4 (code for accession value)

See Valuations Schema for more details.

One link shown to keep diagram compact. Corresponding TableID values: **Authority 01 -> 523**, **Authority 02 -> 524**, ..., **Authority 80 -> 602**

The TableID value is the Authority number plus 522.
